WIRELESS LINKS FOR DIRECTING STUDIO PRO-
DUCTIONS. [1963] 19p
Order from SLA \$1.60

TT-64-14627

Trans. of [die] Kino-Technik (Germany) 1962 [v. 16]
no. 2, p. 37-41. (Abstract available)

DESCRIPTORS: *Intercommunication systems, *Radio
communication systems, Low frequency, Inductance,
Radio transmitters, Radio receivers.

Wireless links are finding an increasing use in modern
studios where they provide one-way audio connections
from the direction centers to the principal groups of
personnel. For technical reasons, as well as because
of official regulations, the system suitable for this
purpose is primarily that operating on the induction
loop principle. This paper describes a multichannel
device and considers in detail the design of the sender
and receiver. (Author)
